If you've done your research you'll know these suffer from rear suspension sagging and rear wheel bearing noise. This has a Pedders rear suspension conversion done in the last couple of months plus a new rear bearing for the MOT this week. It had a new battery and aux belt in February and has just had new rear discs and pads. It's had around £700 spent on it in the last few months. It's been in daily use - 75 miles a day and runs beautifully. Original CD stereo now back in the car. Leather is really good, everything works including the nice cold air con. Great condition with only a couple of small dings and scuffs. My own personal car. Part-ex welcome., £2,795
